

LISTENING FORUM - HEALTHCARE INFORMATION TECHNOLOGY:

LISTENING FORUM - HEALTHCARE INFORMATION TECHNOLOGY:

Improving Healthcare Outcomes and Delivering Savings

with Congressman Danny K. Davis and the

Ways and Means Committee & Illinois Congressional Delegation (Invited)

Monday, June 22, 2009 Building

8:30 A.M. - 11:00 A.M.

Rush University Medical Center

Academic Facility

600 S. Paulina St. (Paulina/Harrison)

9th Floor, Room 994

As the Congress prepares to develop healthcare reform legislation, it is looking closely at how electronic medical records can be used in a broad range of health care applications. These applications include settings to reduce errors and improve the quality and the delivery of care. Better IT will provide significant efficiencies that will reduce the cost of healthcare.

Congressman Davis and his colleagues have invited an array of members of the healthcare community. Many are currently implementing health information technology in hospitals, community health centers, and physicians' offices to speak about their experiences. Please join us for a demonstration and discussion of the use of information technology in healthcare settings.

Please RSVP to Yul Edwards via yul.edwards@mail.house.gov or 202-225-5006 by June 18, 2009.
